

3 REASONS TO AVOID

WALK-IN CLINICS

1 CONTINUITY OF CARE

It affects your quality of care.

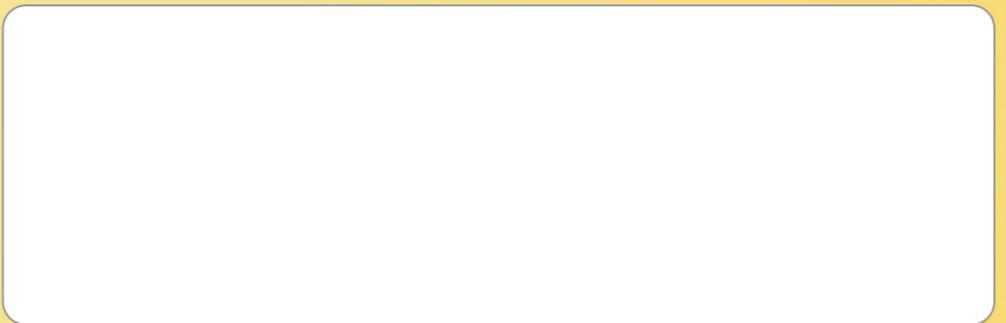

- We don't get any information from your visits to other clinics, so we can't follow up
- Walk-in clinics don't have your complete medical history, which could affect the quality of care you receive

2 AVAILABILITY

We are more available than you might think.

CALL US FIRST – WE OFFER:

- Urgent same-day visits
- Evening and weekend hours
- Telehealth Advisory Service (THAS) at 1-866-553-7205

3 ACCESS

You have access to a team of doctors and staff.

- This office is part of a group of physicians under a Family Health Organization (FHO). That means you have access to a whole network of family doctors to provide care when you need it.

If it's an emergency, please go to the nearest Hospital Emergency Department.
